ter should be kept beyond the pale of money-making that it is possible the State authorities went to another extreme in the allotment of contracts. This view of the question seems to be emphasized; for William Flinn, the well-known Pittsburg contractor, and General D. H. Hastings, on the part of the State, are at issue.

Mr. Flinn has received notice within the last 48 hours that Thomas G. Carlin & Co., contractors of Allegheny, would bring suit

contractors, of Allegheny, would bring suit against him for \$4,700; also that William

Anshutz, contractor, of Allegheny, would bring suit against him for \$2,200, both of these claims being bills rendered to the Governor's Commission, and both of them unpaid by the State. Mr. Flinn's connec-

unpaid by the State. Mr. Finn's connection with the whole affair was as guarantor of both accounts. He expects the suits to be brought at the next term of court.

Mr. Flinn's personal explanation of this peculiar incident of the Conemaugh flood was given to a DISPATCH reporter last

I should not have said anything about this

night, as follows:

I should not have said anything about this matter so long as there seemed any possibility of the settlement of these bills, but as I have been notified that I would be sued by Messra. Carlin and Anshutz, the matter is bound to become public. The history of the affair is as follows: When I moved my whole force but an office boy and a clerk to Johnstown, I took along some holsting engines. They were absolutely necessary in the cleaning up of the creek. General Hastings was struck with their usefulness and asked me where some more could be secured. I introduced Mr. Carlin to him, and the upshot of the conversation was that General Hastings told him to bring up all he could lay his hands on. Mr. Carlin finally brought up 16 engines and men to work them. General Hastings made an absolute contract with Mr. Carlin, in my presence, for the amount to be paid for the engines while used. Mr. Carlin turned to me and asked me if I would guarantee his payment. I answered "yes." So he went to work. I also surgested to General Hastings that Contractor William Anshutz, of Allegheny, had two tower engines that would be invaluable in clearing away the debris. "All right," said the General. "Bring them up here. It will be all right." So I telegraphed Anshutz, and he lost no time in bringing up his men and setting them to work. He also had an understanding with Hastings, I believe. At any rate my telegram made me responsible, and I sent telegram bo Carlin to cut his bill, which was framed upon Hastings' own terms—35 per cent—which he did, the bill amounting to \$4.700. Anshutz's bill was \$2.200. The chief engineer got hold of the bills and cut Carlin's one-half and Anshutz's down to \$1.600. Both contractors kicked, and so the matter rested until the other day when Mr. Carlin said he was not used to having absolute contracts arbitrated, but that if General Hastings would agree to arbitrators i

Mr. Carin said he was not used to having absolute contracts arbitrated, but that if General Hastings would agree to arbitrators in Pittsburg so as to save him (Carlin) the time and expense of running around the State, that he would consent to arbitration just to show the public that the bill was reasonable. The members of Encampment No. 1, Union Veteran Legion desire to unite with their fellow citizens in paying tribute to the memory of the late William Thaw.

He was born in Pittsburg. His whole life was spent here. From early manhood he was identified with Pittsburg's growth and advancement. His varied business interests brought him in contact with people in every condition of life, and he secured and retained the confidence and esteem of all. By his generous recognition of worth in others, many obtained success whose merits and genius might otherwise never have been considered.

During the late war no one in this pattriotic community more liberally or more willingly contributed to the Union cause. He made a reality the pledge while the soldier was at the front his family should not want. The widow and orphan—the maimed and unfortunate old soldier, caused by our few years' struggle—all these profited by his benefactions.

His public spirit, his unostentations giving, his genuine charity, were characteristics of broad philanthropy and true greatness. He was indeed Pittsburg's first citizen, and we

Nearly every member, who had not left for Cleveland who had not left for Cleveland, to attend the meeting of the association to be held there to-day, was present and discussed the impending strike. After several hours' talk, it was unanimously agreed to stand by their original position, and refuse to yield to the demands of the workers' association. Every manufacturer present said he would go to the meeting and vote to strike rather than grant the advance. They will also stick out for a late resumption of

> A PICNIC CAUSES A STRIKE. The Carpenters and Others at the Exposi-

They asked to be allowed a half day off, but the asting uninterruptedly for 1,185 days, or asked to be allowed a half day off, but the contractors—Messrs. Murphy and Hamilton—refused. To go, anyhow, the men struck against the non-union men.

When the carpenters quit work, the stonemasons and slaters employed there, who are in the Building Trades League, since May 26, 1886, has averaged above 200 tons a day, and even at that rate would have turned out about 237,000 tons. But for over two years it averaged about 1,600 tons a week, which would bring the total up to nearly 250,000 tons.

IRON RATES TO ADVANCE.

The Railroad Companies Want a Little of the Prosperity.

A meeting of the Pittiburg Committee of Freight Agents was held yesterday in the office of the Lake Shore road, on Wood street. Owing to a technicality the meeting djourned until to-day, when the rates on all articles of iron and steel manufacture will be advanced about 10 per cent. Prior to June 8, of the present year, when the prices of iron were very low, and manu-

facturers complained of poor business, the Pittsburg committee recommended to their respective lines and associations a reduction in the rates. This was done.

THE THAW FUNERAL.

August 28, and in Pittsburg on Thursday.

Mr. Frank Semple said yesterday that a cablegram had been received from Mr. Griscom, President of the Inman Line, that the body would be taken home on the City of Paris, which sails to-morrow. Mr. Thaw went to France in the same boat in which he is interested financially, and the good ship will also bring back his remains.

Concerning the arrangements for the funeral, Mr. Semple said: "If the body arrives on Thursday of next week the funeral will likely take place the next day. If the condition of the body will permit the face will be exposed all of Thursday in the Third Presbyterian Church for the benefit of the public. No further arrangements have been made. It has not been decided what minister will officiate."

There is a strong feeling among the citizens that Mr. Thaw should be honored by having the body lie in state, but the family and the most intimate friends of the dead benefactor are decidedly opposed to anything of the kind or are worklind demonstra-
